

MP2307 LM2596 Kis-3r33S DC-DC Converter Buck module Peak 4A

Highest Efficiency Of 98%

Feature:

- Input voltage range: 4.75-24V
- Output voltage range: 0.93V-18V (step-down operation mode, enter at least greater than the output 2V above)
- Output Current: 2.5A peak output 4A continuous output!
- Switch: With soft-off function! After microamps shutdown current low level!
- Size: 45mm * 32mm * 1.6mm
- Num: YS-TB
- Technical Description:
- Synchronous rectification technology! Maximum efficiency of 98%!
- Efficiency Found:
- 12V turn 5V efficiency = $(5V * 1.001A) / (12V * 0.431) = 96.7\%$
